

SS495

Linear Hall Effect Sensor

Features

- Miniature construction
- Low-Noise Output
- Good Consistency
- High sensitivity
- High reliability
- 4.5 V to 10.5 V Operation Voltages
- Magnetically Optimized Package
- Linear output for circuit design flexibility
- Temperature range from -40 °C to 150 °C

3 pin SIP (suffix UA)

Description

SS495 Linear Hall-effect sensor is a small, versatile linear Hall-effect device that is operated by the magnetic field from a permanent magnet or an electromagnet. The linear sourcing output voltage is set by the supply voltage and varies in proportion to the strength of the magnetic field. Specifically, when S495 is in the zero magnetic field conditions, the output voltage is half of the supply voltage. When south poles approach the S495 marking surface, the output voltage will increase linearly with the magnetic field strength; on the other

hand, north pole will cause output voltage decreases linearly with the increase in magnetic field strength. The integrated circuitry features low noise output, which makes it unnecessary to use external filtering. It also includes thin film resistors to provide increased temperature stability and accuracy. The linear Hall sensor has an operating temperature range of -40 °C to 150 °C appropriate for commercial, consumer and industrial environments.

Typical Applications

- Electric vehicles speed regulation pedal
- Motion detector
- Gear sensing
- Motor control
- Magnetic code reading
- Ferrous metal detector
- Current sensing
- Position sensing
- Proximity detector

Installation Caution:

- Should be installed by minimizing the mechanical stress on the Hall circuit;
- On the conditions of ensuring the quality of the welding, the welding temperature and time should be reduced as far as possible.

Package Information

Package UA, 3-Pin SIP (Unit:mm):

Notes:

- Controlling dimension : mm ;
- Leads must be free of flash and plating voids ;
- Do not bend leads within 1 mm of lead to package interface ;
- PINOUT: Pin 1 VDD
Pin 2 GND
Pin 3 Output
